

ABDI AHMED MOHAMUD

London, United Kingdom | +44 07935 268878 | Abdimoha1818@gmail.com | linkedin.com/in/abdimohamud-

PROFESSIONAL PROFILE

BSc (Hons) Information Technology graduate with practical experience in IT systems, technical troubleshooting, networking, systems administration and customer-facing operations. Hands-on knowledge of Windows, Windows Server 2025, Linux, VMware, Microsoft Entra ID, Docker and infrastructure monitoring through personal projects and technical labs. Experienced Night Manager responsible for hotel systems, reporting, reconciliations, problem resolution and independent decision-making in a fast-paced environment.

CORE TECHNICAL SKILLS

IT Support: Hardware & Software Troubleshooting | User Support | Problem

Resolution | Incident Escalation | Technical Documentation

Microsoft & Systems: Windows | Windows Server 2025 | Microsoft Entra ID |

Active Directory Concepts | User & Group Management | Permissions | Access

Control

Networking & Monitoring: TCP/IP | DNS | DHCP | Network

Troubleshooting |

Network Configuration | VMware Networking | Grafana | Prometheus |

System

Monitoring

Infrastructure: VMware | Virtualisation | Linux Server Administration | Docker | Git

| GitHub

Cybersecurity: Risk Assessment | Threat Analysis | Security Policies & Controls |

Identity & Access Management | Network Security Fundamentals

Programming & Data: Python | SQL | Java | JavaScript | HTML | CSS | Pandas |

NumPy | Scikit-learn

Professional: Problem Solving | Analytical Thinking | Communication |

Customer Service | Teamwork | Time Management | Prioritisation

EDUCATION

BSc (Hons) Information Technology

University of West London, UK | 2022 - 2026

Relevant Modules: Enterprise Security | Networks & IT Infrastructure |

Programming | Databases & Analytics | Business Intelligence | Project

Management | Web & Mobile Application Development

Final Year Project: Energy Prediction Dashboard - Next-Hour Building Energy Forecasting using LSTM Time-Series Modelling.

LANGUAGES

PROFESSIONAL EXPERIENCE

ASHBURN HOTEL, LONDON

Night Manager | 2022 - Present

- Manage night-time hotel operations, ensuring smooth and efficient running of the property throughout overnight shifts.
- Carry out night audit procedures, daily reconciliations, financial checks and end-of-day reporting, ensuring records and operational systems remain accurate.
- Monitor hotel systems and operational processes, identifying issues and taking appropriate action or escalating problems to the relevant team.
- Use hotel computer systems and workplace technology during daily operations, carrying out routine checks and resolving basic issues where appropriate.
- Maintain accurate records and shift handovers while prioritising competing tasks, working independently and communicating effectively with guests, colleagues and management.

TECHNICAL PROJECTS

Windows Server 2025 & Microsoft Entra ID Lab (Personal Project | Ongoing)

- Building a Windows Server 2025 evaluation environment in VMware; configuring users, groups, permissions and security settings.
- Developing practical knowledge of Microsoft Entra ID, identity and access management, authentication and Active Directory concepts.
- Troubleshooting Windows Server, networking and authentication issues and documenting configurations and solutions.

IT Infrastructure & Monitoring Lab

- Built and administered a Linux server environment using VMware; configured users, permissions, services and network connectivity.
- Deployed Docker containers with Grafana and Prometheus for infrastructure monitoring and created dashboards for system performance.
- Practised remote administration, troubleshooting, service management and network configuration.

Energy Prediction Dashboard - Python / Machine Learning

- Developed an end-to-end energy prediction dashboard using Python, TensorFlow, Pandas and NumPy.
- Built and evaluated an LSTM time-series forecasting model using MAE and RMSE and applied SDLC principles through testing and deployment.

Enterprise Security Management

- Conducted security risk assessments, identified vulnerabilities and threats, and developed security policies and controls.

Database & Web Development

- Designed relational databases using SQL, including normalisation, joins, aggregation and reporting queries; developed responsive web applications using HTML, CSS and JavaScript.
